

Let's go in search of tapirs!

And of course other animals and plants of the area. This is a unique and new tour in the area, led by a local family. Both possible tours are hikes in a private reserve, where you will find animals and plants that are also found in the Corcovado National Park, and all a bit cheaper than the already known tours to Sirena or San Pedrillo. This tour is also very suitable for families with children.

The morning tour lasts from 6:30 to 13:30. Immerse yourself in a unique ecosystem, observe the interaction of flora and fauna in a private reserve within the Golfo Dulce Forest Reserve. You will hike spectacular trails and cool off in pristine rivers. At the end of the excursion you will enjoy a delicious typical Costa Rican lunch.

The afternoon excursion lasts from 14:30 to 20:00. Watch the transition from afternoon to night and listen to the sounds of the different inhabitants of this ecosystem as the day slowly fades away. The arrival of nocturnal animals in this reserve is magical. Enjoy this exclusive experience with a certified professional guide on the Pacific coast of Central America. A delicious typical Costa Rican dinner awaits you at the end of the adventure.

Here is the most important information:

- Start: 6:30 a.m. (or 2:30 p.m.)
- End: 1:30 p.m. (or 8:00 p.m.)
